

**BROWN**

SINCE 1970

**25**  
YEARS

**Hockey '95**

I am pleased to present to you, in our 25th year of business, our expanded goaltenders' line for 1995. Our product line includes new products in all categories, but I am especially excited about our new MANIAC series for Roller Hockey. This year, our product line has been redesigned to offer goaltenders several unique graphic appearances, enhanced puck stopping functions, and as always, superior protection.

I have always felt our advantage over the competition is that I am a goaltender who continues to play, using this as the basis of our product development, in conjunction with our pro goalies' needs. In the early years of this company, product improvement consisted of creating products that reduced injury from shots.

With that in place, we have focused our efforts on product innovations to help stop the puck, such as pant wings, flared catch glove cuff and the rigid "5-hole" area of the goal pad.

This year's new ELITE line advances this concept. The ELITE contour and off-set leg channel enables the goaltender to take a wider stance without opening the "5-hole." The ELITE shoulder flap wings and cruiser arm flaps on the new JB551 makes the goaltender look bigger, stopping a surprising number of shots. The ELITE contour of the JB55 blocker fills the "7-hole" (between your arm and body and stick side) and offers coverage outside of blocking range for high corner shots.

The JB75 catch glove has the removable flex cuff for quicker drying in back to back games. The JB701 bag is designed to easily pack your equipment into as you take it off in the dressing room and carry to your vehicle. The Softech Cushioning System makes Brown equipment comfortable to wear.

This continuing evolution of Brown equipment will ensure Brown is the choice of goalies from Novice to Pro.

  
President

**For 1995, John Brown Custom Sports will again provide a wider range of goaltenders with quality equipment.**

**ELITE SERIES:** For the competitive goaltender. Wear what the Pros wear. Senior and Junior models available. Latest in graphic design.

**EXCEL SERIES:** The innovative Excel Series will once again be available for the pro goaltender. Senior and Junior models available.

**ILLUSION SERIES:** NEW exciting graphics will offer all goaltenders of all ages a complete line of Brown products at a competitive price.

**MANIAC :** The best available roller hockey equipment for the competitive deck or roller hockey goaltender. Senior sizes only.

**THUNDER BALL** Popular Thunderball with refinements will be available again this year for Senior and Junior, deck and roller hockey goaltenders.

## ILLUSION JB 146 JR

All clarino construction with **ILLUSION** graphics

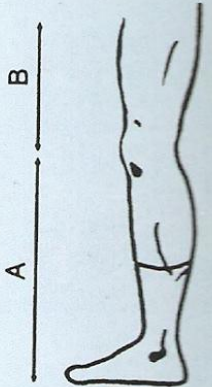

Size: 25, 27, 29

Weight 3.5 lbs.

## BROWN GOAL PAD FITTING

Brown products are designed and handcrafted for maximum performance and durability. However, the accurate, initial fitting of new equipment is a critical prerequisite for goaltenders in achieving maximum satisfaction from the Brown "custom" advantage.

1. Measure in stocking feet the distance from floor to centre of knee cap. Example: A = 18"
2. Measure distance from centre of knee to mid-point of upper leg. Example: B = 10"
3. Add the above two measurements together and add 5" to get length of pad. Example: 18" + 10" + 5" = size 33

Note: Add 4" instead of 5" for Junior Pads.

Various colours of **ILLUSION** SERIES  
JB211SR  
JB201 SR  
JB186 INT &  
JB146 JR

Many more colours available.
