Reebok hockey products were developed and tested in close collaboration with NHL® players. Products bearing the NHL® Platinum Shield are the authentic products worn by NHL® players and top professionals around the world.

Reebok

A close-up, low-angle shot of the side of a black sneaker. The image is dominated by a large, white, stylized stripe that curves across the frame. Below the stripe, the word "Reebok" is printed in white, bold, sans-serif font. The sole of the shoe is visible, featuring a series of white, rectangular perforations. The background is a light, neutral color, and the lighting creates a strong highlight on the stripe and the sole.

8.0.8 O-STICK

HS808

NEW

Newly designed and engineered to provide optimal power. The new 8.0.8 O-Stick features a redesigned Power Port Zone, new Pure Fiber Technology™ for direct energy transfer, an optimized balance point, new proprietary Griptonite™ and an ultra light blade. This new O-Stick is light, fast and strong, the perfect combination for PURE POWER!

8 POWER PORTS™

More aerodynamic arches provide less drag than ever before increasing stick speed and power.

PURE FIBER TECHNOLOGY™

Individual carbon fibers run through the shaft straight down to the blade for maximum energy transfer.

Reebok
PURE FIBER

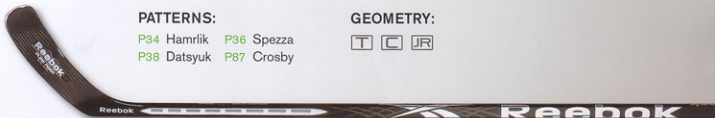

GRIPTONITE™

New Reebok proprietary grip enhances control for better reaction speed.

GRIPTONITE

LIGHT GRAPHITE BLADE

Reduces weight at the bottom of the stick and adds significant power.

10K SICKICK II

HS10K / HS10K GOLD

NEW

Explosive kick now combined with lethal control. The 10K features Sickick II Technology™ that combines the fast release of the original Sickick with a new matrix fiber construction. The newly added matrix construction increases shaft stability and reduces blade deformation for ultimate control and precision. Add the new Pure Fiber Technology™, Reebok's proprietary Griptonite™ and new Blade Control Technology to feel the EXPLOSIVE CONTROL.

SICKICK II TECHNOLOGY™

Ultra low kick zone for fast release with matrix construction for ultimate control and precision.

ULTRA LIGHTWEIGHT

High modulus graphite makes this stick Reebok's lightest ever.

BLADE CONTROL TECHNOLOGY

Super light graphite blade with superior dampening properties for added control.

PURE FIBER TECHNOLOGY™

Individual carbon fibers run through the shaft straight down to the blade for maximum energy transfer.

9K PUMP® SKATE SK9KP

The Reebok Pump® skate enhances the speed of energy transfer to the ice through its structural support and stability, accelerating more power into each and every stride. The 9K Pump® skate guarantees heel lock, ankle support and enhances forward flex resulting in a secure comfortable fit. The Pump® technology offers players the maximum personalized performance.

THE PUMP®

The ultimate in personalized pro performance and comfort.

PRO ARMOUR™ III R-CORE™

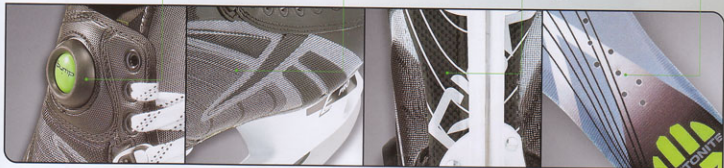

Lightweight Quarter has a strategically reinforced core providing structural support and enhanced stability.

LIGHT WEIGHT LOW PROFILE CARBON OUTSOLE

The lightweight low profile perforated outsole minimizes mass, maximizes energy transfer and delivers a reactive feel.

GRIPTRONITE™ FOOTBED

Alleviates foot slippage with its Griptonite™ heel and fibergrip top cloth.

8K HELMET HT8K

The 8K helmet was developed to incorporate some of the most cutting edge technologies. The easy to use Microdial™ provides true 360 degree fit and the comfort cushions provide a superb, soft, snug fit. The 8K helmet uses the same carbon fiber technology that revolutionized the hockey stick market to offer the lightest helmet possible without sacrificing protection.

COMPOSITE SUBSHELL™

The composite Subshell™ helps create the lightest helmet on the market without sacrificing protection.

MICRODIAL™

The Microdial™ allows for easy width adjustment giving a true 360 degree fit.

FITCLIP™

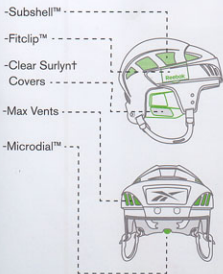

The Fitclip™ permits easy length adjustment.

10K KFS PROTECTIVE

KINETICFIT

The 2009 Reebok protective equipment line now incorporates Kinetic Fit System (KFS) technology. The idea is that in order to maintain the highest level of performance, comfort and protection, the equipment needs to move with the player. Considerable effort was put into studying the movement of the body to ensure that Reebok products not only protect the player but also enhance the player's performance.

SEGMENTED FRONT:

The two-piece front allows the sternum cap and the belly protector to stay in place as the player moves.

SEGMENTED BACK:

The three-piece spine is capable of following the body's natural movement without sacrificing protection.

HINGED CLAVICLE:

With a hinge at the clavicle, the only part of the pad that moves when the player lifts his arm are the shoulder and clavicle caps.

KFS SHOULDER BLADES

Allows the back of the pad to change dimension as the player moves, meaning that the player is not fighting against the pad as he plays.

JDP® CAPS

The Joint Discharge Principle (JDP®) uses the principle that the cap should disperse impact away from the fragile joint and into the big surrounding muscles. This concept is applied to protect the shoulder, elbow, knees and hips and is one of the reasons more NHL® players wear Reebok-designed protective equipment than any other brand.

9K PANTS

HP9K

Reebok's revolutionary core system combines pro level protection with outstanding freedom of movement to achieve hockey's first performance-enhancing pant. Weight is strategically dispersed closer to the body resulting in less player fatigue. Thigh guards are fully customizable and independent from the core to optimize stride length. Treated with Playdry[®] for improved moisture management, the 9K pant features strategically located stretch material, ventilation and abrasion-resistant zones.

CORE AND SHELL CONSTRUCTION

A streamlined pant with focus on performance.

INDEPENDENT CUSTOM THIGH GUARDS

Adjustable both in length and in width.

JDP[®] HIP CAPS

Protect the hip by dispersing direct impacts away from the joint.

MOLDED SPINAL PROTECTOR

Remains close at all times for ultimate comfort and protection. Strategically placed ventilation increases air flow on the lower back.
