WARRIOR HOCKEY 2009

WELCOME TO THE MADHOUSE

Welcome to mad science. Welcome to mad at the world of average, ordinary, and uninspired. Welcome to the new means to dominate. Welcome to the new technology voodoo. Welcome to unapologetic, unrestrained, uncut, unequalled product. Welcome to the new line of protective gear for hire. Welcome to more patents and proprietary tech than NASA. Welcome to the wildfire that continues to burn up the ice. Welcome to the side arm of choice for Kovalev, Kovalchuk, Modano, Pronger and Smyth. Welcome our new brethren: Phaneuf, Lidstrom, Turris, Sturm, Wheeler and Mueller. Welcome one and all to the greatest show on earth. Welcome to Warrior 2009. Welcome to the Madhouse.

WARRIOR STICKS 09

SPYNE SHAFT

The next evolution of Warrior's revolutionary Spyné blade technology. The Spyné concept has been adapted to be compatible with the flex and release action of the shaft, resulting in less torque, a more precise kickpoint, and a faster reaction time. The subtle molded feature creates an internal framework that stabilizes and controls the flex to deliver the optimum amount of power to every shot.

WARRIOR.COM

SPYNE BLADE

Warrior's patented Spyné blade uses the latest in carbon-molding technology to bring you the most precise and accurate shot control in history. What it is: Molded structural feature on the back face of the graphite blade.

What it does: Acts like a spring, directing energy into the heel of the blade. Releases energy faster with more control and accuracy. Reduces blade torque and reduces weight.

Why it works: Molded shape creates an internal carbon structure. The stiffness effect follows the shape of the Spyné feature around the edges. By designing the shape accordingly we can control the direction and flow of energy from the toe of the blade into the heel.

WARRIOR.COM

HD BLADE WITH ANGEL HAIR TECHNOLOGY

Foam shouldn't be used in hockey sticks...Foam is for teddy bears, flip flops, and push-up bras, which is why we've developed a completely new core material that uses high-impact epoxy combined with Angel Hair micro-strands of carbon fiber. This produces a rigid, durable blade core that has more spring and pop than ever before.

The HD blade core is heavier than a comparable foam core because it carries more flex and impact. This allows us to reduce the carbon exterior of the blade to improve response and results in a lighter overall weight.

TRUE-1 PIECE CONSTRUCTION

Molded in one continuous process and designed to provide maximum feedback between your hands and the puck. A True-1 piece stick provides the ultimate in balance and accuracy.

UBER-LOW KICKPOINT

Available only in our True-1 piece sticks. Uber-Low Kickpoint concentrates flex energy into the lower shaft and upper blade for the fastest release possible. Allows shots to load up quickly and launch with accuracy.

PRECISION LOW KICKPOINT

Concentrates flex energy into the lower part of the shaft, releasing it in an explosive burst.

CONSTANT FLEX PROFILE

Shaft flexes and reacts based on your shooting style. Whether you hold your shaft high or low, release it fast or slow.

3-SKIN IMPACT PROTECTION

Proprietary composite skin that protects the shaft against impact. Provides medium durability with little additional weight.

5-SKIN IMPACT PROTECTION

Proprietary composite skin that protects the shaft against impact. Provides maximum durability and protection.

FNA IMPACT ABSORPTION - GOALIE

Specialized design that deadens impact and softens vibration. This reduced vibration allows you to more comfortably enjoy the satisfaction of shutting down twinkle-toed cherry-pickers without leaving your hands sore.

PRO-BALANCED - GOALIE

The weight and balance of the paddle is specifically harmonized to correspond to the weight of the shaft to provide effortless flexibility and freedom of movement.

TUFF-STRIP BLADE - GOALIE

Reinforced ABS strip on the blade to prevent cracking and fatigue. Keeps the blade light and nimble but adds protection where you need it most.

DOLOMITE SPYNE

NO OTHER STICK HAS THE BACKBONE TO STAND UP TO IT. BECAUSE THE DOLOMITE NOW HAS SPYNE.

A lab tested, ice-proven, rogue-engineered blade design for unbeatable reaction and stability.

- + 440 Grams
- + New Direct Taper Shaft Design
- + HD Blade with Angel Hair Technology
- + Spyne Blade Technology
- + Nipple Grip Coating
- + 5-Skin Impact Protection

DIRECT TAPER SHAFT DESIGN:

Redesigned shaft taper that boosts performance and increases accuracy. Length and geometry of the taper are modified to reduce slop, increase shot-loading capacity and speed the reaction time of the stick.

HD BLADE WITH ANGEL HAIR TECHNOLOGY:

New blade core technology that combines high impact epoxy with microstrands of Angel Hair carbon fiber. The core of the blade is highly reinforced with small microstrands of carbon fiber in this proprietary method (patent pending), producing response and reflex that are unmatched.

THE JOHNSON

NAMED AFTER A TOTALLY BADASS DUDE WE USED TO KNOW FROM PHILLY.

Too hardcore for a first name. Only went by Johnson. So in his honor, we tagged this baby with his name. And just like him, it's tough as nails, light on its feet, and freakishly old school in its style. So, what'd you think we named it after?

MEN OF ACTION: PROTECT YOURSELVES. SUIT UP FOR THE RUMBLE. GEAR UP FOR THE BRAWL. SHIELD YOURSELF FROM THE SKULL-MELTING CROSSCHECKS. THE BONE-CRUSHING COLLISIONS. THE PILE-UPS INTO THE BOARDS. GET THE GEAR THAT PROTECTS EVERYWHERE YOU NEED IT. SO KICK ASS. TAKE NAMES. BUT DO IT WITH PROTECTION.

MEN OF ACTION

The relationship between Warrior Hockey and MIA continues with an expanded product line and offerings for 2009. Warrior continues its devotion to creating the highest quality and performance product from the pros to the Warrior consumer. Based on feedback from equipment managers and the ever-expanding Warrior Player's Club for protection and spec, all products are made in Canada and designed with high-level hockey in mind.

Warrior DNA Concept keeps one simple idea in all product design: form facilitates function. All protective product is designed based on movement, fit, function and proper shape. Every detail falls back to our DNA Concept, from cuff openings on gloves to shin cap anatomical shape and hyperextension lock.

Pro Impact Management Protective System means we take care in what we use for our glove, pant, shin, shoulder and elbow internals. We offer High Impact High Density foams to Low Density open cell comfort foams in many products as well as using the highest quality plastics and molded hard foams to achieve greater high-impact protection. We try to cover every kind of impact a hockey player will be exposed to during the course of a game.

Patented process to ensure liner is antimicrobial and moisture wicking. Technology from the medical industry, Silver Shield is used in everything from scrubs and bed linens to surgical masks to keep out bacteria and viruses.

Fully adjustable strapping system on both back and front ensures the best fit and full coverage on all wrap-around straps. Proper sizing and fit also help with mobility.

This patented technology is exclusive to Warrior Hockey. The Armadillo retractable design refers to collapsible caps that fold onto themselves to provide the utmost coverage and protection while yielding to full motion in key areas like shoulder caps, elbow caps and arm pads. Armadillo multi-layer protection technology applies to our shin suspension padding system allowing for more protection and mobility. The layering of these caps and padding allows for thinner pieces in key areas helping to reduce weight and overall bulkiness.

Independent back pad stays close to the lower back in skating position. Back pad is reinforced with ribbed plastic and High Density foams along with low density impact foam for optimum coverage and comfort.

Increased flap protection from pant to shoulder pad ensures optimum gap coverage in every vulnerable area of protection. Shoulder pad SixPack pad is removable and adjustable. Hockey pant SixPack is held in place with belt and covers belt to waist gap.

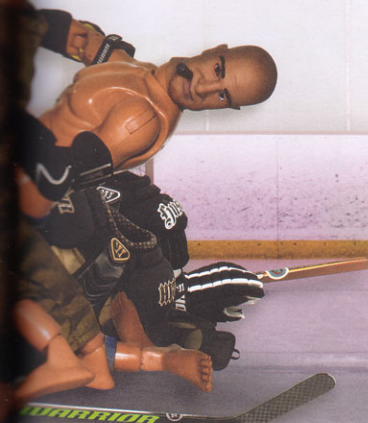

The Sling Wrap is used in the most important areas of the shin and elbow pad to prevent twisting and sliding. Sling Wrap uses the best quality materials and contact point to ensure comfort along with stability.

The Shock Cushioning Protective Network of padding uses various densities of high quality foams to shield the most vulnerable areas of the shoulder pad. Using a two layer system of High and Low density foams with insert foam bumper pads, all types of contact or impact can be protected against.

VTEK provides moisture wicking and antimicrobial features. Moisture is not absorbed into the pad leading to longer wear, faster dry time, and a reduction in moisture weight during the course of the game.

HUSTLER

Delivers the pain as it keeps you comfortable.

PRODUCT FEATURES:

- Pro level design with ultimate mobility from multi-layer floating protection areas
- 2 piece patented Armadillo shoulder cap improves flexibility and is non-binding
- 2 piece patented Armadillo bicep protection
- Independent floating plexus and spine protector with HD foam reinforcement
- Perforated foam jacket with Low Density foam for protection and optimum air flow
- Segmented HD foam collar blocks
- Silver shield moisture wicking antimicrobial liner
- 2 way adjustable strap provides proper fitting ability
- Removable added mid body and lower back pad flaps

The relationship between Warrior Hockey and MIA continues with an expanded product line and offerings for 2009.

Warrior continues its devotion to creating the highest quality and performance products from the pro to the Warrior consumer. Based on feedback from equipment managers and the ever-expanding Warrior Players Club for protection and spec, all products are made in Canada and designed with high level hockey in mind.

GLOVE TECHNOLOGY

POUNDRING YOUR OPPONENTS IS WAY BETTER THAN SCUFFING YOUR PAWS. THAT'S WHY YOU NEED PROTECTION TO TAKE THE CHECKS IN STRIDE WITHOUT HINDERING YOUR MOVEMENT. WARRIOR GLOVES ARE NO ORDINARY MITTS. THEY'RE CUSTOM ENGINEERED BY THE TOUGHEST PROS ON THE ICE TO LET YOUR FINGERS, KNUCKLES AND WRISTS DO THEIR DIRTY WORK. COMFORT. QUALITY. PROTECTION.

Warrior DNA Concept keeps one simple idea in all product design: form facilitates function. All protective product is designed based on movement, fit, function, and proper shape. Every detail falls back to our DNA Concept, from cuff openings on gloves to shin cap anatomical shape and hyper extension lock.

All glove patterns are contour fit to follow the natural curves of the hand. This simple idea takes many hours to perfect and design so the patterns of our gloves properly fit the many complex curves of the hand and fingers. Proper fit and function lead to better mobility and protection.

DEMON

The Demon platform design was created for the player that likes a snug, form fitting glove with optimum protection and mobility built in. Utilizing the 12° gripline system, the shape of the glove follows the natural shape of the hand when gripping the stick. Added to that are 1/3-2/3 split fingers and the open cuff for added grip tension without sacrificing wrist mobility.

PRO 4BAR

The #1 choice of pro players, the Pro 4Bar was designed for the player who prefers a more traditional look with progressive mobility. Straight back rolls and fingers offer popular styling cues from conventional gloves, but the angled and open cuff with tiered flaps offer the utmost in wrist mobility. Add to that split fingers and contoured back rolls and you have a classic glove for today's competitive player.

Patented process to ensure liner is antimicrobial and moisture wicking. Technology from the medical industry, Silver Shield is used in everything from scrubs & bed linens to surgical masks to keep out bacteria and viruses.

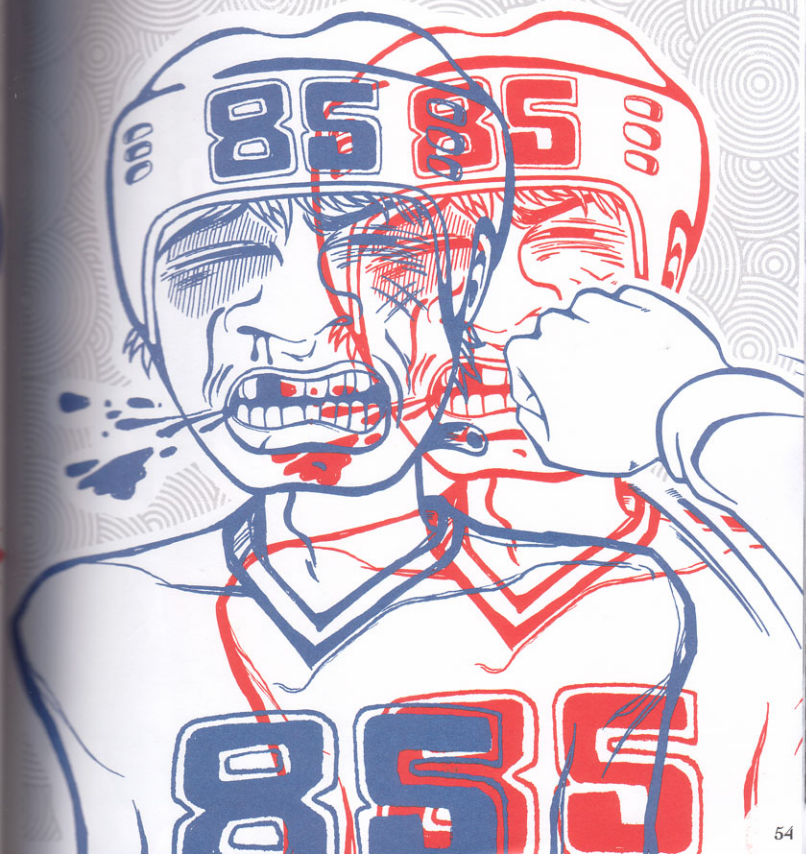

PIMPS

Pro Impact Management Protective System means we take care in what we use for our glove, shin, shoulder and elbow internals. We offer High Impact, High Density foams to Low Density open cell comfort foams in many products as well as using the highest quality plastics and molded hard foams to achieve greater high impact protection...We cover every kind of impact a hockey player will be exposed to during the course of a game.

VTEK provides moisture wicking and antibacterial features. Moisture is not absorbed into the glove, leading to longer wear, faster dry time and reduced moisture weight during the course of the game.

WHAT IS

Custom is built-from-scratch, made-to-order, high-quality, one-of-a-kind, assembled-by-hand gear. It's gloves in 35 color choices. Multiple material options. Internal padding choices. Wide or narrow fits. It's custom pants tailored to your waist and length. Stitched in every color combination imaginable. It's bags etched with your logo, covered in your colors. Custom is you. For you. And by you. Because your game is your game. And it deserves gear built just for it.
